

## NECK NUBUK

NECK NUBUK is a top class nubuck leather – nature at its purest! Soft and supple on the surface thanks to special buffing techniques. Manufactured with the best dyes and fat-liquoring agents to achieve the highest possible light fastness. First, NECK NUBUK is gently embossed and finally milled for a long period. This gives the leather its distinctively coarse grain pattern. NECK NUBUK is made exclusively from heavy first-class bull hides. Each of them proudly displays its natural features such as scarring, variance in texture or fat wrinkles, enhancing the character of this article: natural, honest, and imposing.

**Application:** masterpieces for true leather

enthusiasts: furniture, leather goods

**Colours:** 15 colours on stock

**Thickness:** 3.0+ mm

**Custom colours:** 150 m<sup>2</sup> per colour

**Delivery:** from our warehouse in Bodenwerder,  
Germany

**Minimum order quantity:** 1/1 hide

**Area:** approx. 5 m<sup>2</sup> per whole hide

**Raw material:** premium Central European bull  
hides

**Tanning:** environmentally friendly mineral  
tanning

**Care products:** Anilin Protector, Water Repellent  
Spray

## TECHNICAL CHARACTERISTICS

Remarks/Test method/Requirements	Nominal value
Colour fastness to rubbing DIN EN ISO 11640 (grey scale level 1-5)	
50 tours dry	≥ 3
20 tours wet	≥ 3
20 tours perspiration pH 8	≥ 3
Colour fastness to light DIN EN ISO 105-B02 (WBS-level)	≥ 3
Tear strength (N/mm) DIN EN ISO 3377-1	≥ 20N
Fire protection standard DIN EN 1021 Part 1+2	i.O.

Quality test certificate in accordance to DGM guidelines 2016

Please note that this test certificate does not relieve the customer of his obligation to inspect incoming goods and may claim of third parties to whom it is passed. It is not a property assurance in legal sense.

## **CLEANING AND CARE INSTRUCTION**

---

NECK NUBUK is a nubuck leather. Nubuck leather is sanded on the surface. Therefore, nubuck is warm and open pored.

For everyday cleaning, it is sufficient to occasionally dust off the leather with a **feather duster** or a dry **dust cloth**.

In the case of fresh stains, first soak with a terry cloth or paper towel by pressing between the fingers. Do not rub! This can change the surface irreversibly. Remaining spots can be cleaned with a damp terry cloth. Not too wet to avoid borders and do not rub too hard. Dry the darkened, wet area with a hair dryer with cold air to avoid water marks. Then sand remaining darkened areas with the **Sanding Pad**. This method is also used when greasy areas because of skin or hair contact are darkened. Always practice a cleaning test in a hidden area!

For difficult stains, it is always better to contact a specialist first. Damage can easily occur due to improper cleaning attempts.

For maintenance, we recommend **Aniline Protector**. The Aniline Protector provides the necessary moisturizing to keep the leather soft and prevents fading.

In case of risk of stains caused by liquids, **Water Repellent Spray** is recommended.

Depending on the strain, heat, and light intensity, the leather should be sparingly maintained every three to twelve months.
