

## CRAZY NUBUK

CRAZY NUBUK: a wonderfully fluffy nubuck leather with an impressive appearance. CRAZY NUBUK is a perfect example of pairing traditions with the latest techniques: this leather is lightly though-dyed, then pre-dried, given a dark top-dye, dried again, then sanded vigorously, leaving patches of grain here and there. This gives the leather its gorgeous, inimitable look. CRAZY NUBUK looks like tree bark, and is a real eye-catcher. Chairs, benches, sofas, they all look fantastically unique! CRAZY NUBUK - made for specialists by specialists.

**Application:** unique leather items: furniture or leather goods

**Colours:** 5 colours on stock - due to the complex finishing process, CRAZY NUBUK requires an accommodating attitude to variations in colour!

**Thickness:** 1.4/1.6 mm

**Delivery:** from our warehouse in Bodenwerder, Germany

**Minimum order quantity:** 1/1 hide

**Area:** approx. 4.8 m<sup>2</sup> per whole hide

**Raw material:** Central European bull hides

**Tanning:** environmentally friendly mineral tanning

**Care products:** Aniline Protector

## TECHNICAL CHARACTERISTICS

Remarks/Test method/Requirements	Nominal value
Colour fastness to rubbing DIN EN ISO 11640 (grey scale level 1-5)	
50 tours dry	≥ 3
20 tours wet	≥ 3
20 tours perspiration pH 8	≥ 3
Colour fastness to light DIN EN ISO 105-B02 (WBS-level)	≥ 3
Tear strength (N/mm) DIN EN ISO 3377-1	≥ 20N
Fire protection standard DIN EN 1021 Part 1+2	i.O.

Quality test certificate in accordance to DGM guidelines 2016

Please note that this test certificate does not relieve the customer of his obligation to inspect incoming goods and may claim of third parties to whom it is passed. It is not a property assurance in legal sense.

## CLEANING AND CARE INSTRUCTION

---

CRAZY NUBUK is a nubuck with a beautiful vintage look. Nubuck is sanded on the surface. Therefore nubuck is warm and open pored.

For everyday cleaning, it is sufficient to occasionally dust off the leather with a **feather duster**, a **dry dust cloth** or to brush off with a **soft brush**.

In the case of fresh stains, first soak with a terry cloth or paper towel by pressing between the fingers. Do not rub! Remaining spots can be cleaned with a damp terry cloth. Not too wet to avoid borders and do not rub too hard. Dry the darkened, wet area with a hair dryer with cold air to avoid water marks. Then sand remaining darkened areas with the **Polishing Pad**. This method is also used when greasy areas because of skin or hair contact are darkened. Always practice a cleaning test in a hidden area!

For difficult stains, it is always better to contact a specialist first. Damage can easily occur due to improper cleaning attempts.

For maintenance, we recommend **Aniline Protector**. The Aniline Protector provides the necessary moisturizing to keep the leather soft and prevents fading.

In case of risk of stains caused by liquids, **Waterproofing for Leather** is recommended.

Depending on the strain, heat, and light intensity, the leather should be sparingly maintained every six to twelve months.
