

RHINO

RHINO is an elegant, thick antiqued leather, available in a full-bodied thickness of 2.0/2.2mm. RHINO has a distinctive, natural tumbled grain pattern that is gently buffed at its crests. Depending on the viewing angle, RHINO's buffing sometimes more or less disappears, almost as if RHINO doesn't want to be defined. RHINO is the adventurous type and thrives on this lack of a label. RHINO's striking far wrinkles and variance in texture are deliberate - RHINO is made for lending furniture or luggage its special charm

Application: upholstery, leather goods

Colours: 15 colours on stock

Thickness: 2.0/2.2 mm

Custom colours: 300 m² per colour

Delivery: from our warehouse in Bodenwerder,
Germany

Minimum order quantity: 1/2 hide

Area: approx. 5 m² per whole hide

Raw material: Central European bull hides

Tanning: environmentally friendly mineral
tanning

Care products: Aniline Protector

TECHNICAL CHARACTERISTICS

Remarks/Test method/Requirements	Nominal value
Colour fastness to rubbing DIN EN ISO 11640 (grey scale level 1-5)	
50 tours dry	≥ 3
20 tours wet	≥ 3
20 tours perspiration pH 8	≥ 3
Colour fastness to light DIN EN ISO 105-B02 (WBS-level)	≥ 3
Tear strength (N/mm) DIN EN ISO 3377-1	≥ 20N
Flexing endurance dry DIN EN ISO 5402 (20.000 bucklings)	No cracks
Fire protection standard DIN EN 1021 Part 1+2	Passed

Quality test certificate in accordance to DGM guidelines 2016

Please note that this test certificate does not relieve the customer of his obligation to inspect incoming goods and may claim of third parties to whom it is passed. It is not a property assurance in legal sense.

CLEANING AND CARE INSTRUCTION

For everyday cleaning, it is sufficient to occasionally dust off the leather with a feather duster or a dry dust cloth.

In the case of fresh stains, first soak with a terry cloth or paper towel by pressing between the fingers. Do not rub! This can change the surface irreversibly. Remaining spots can be cleaned with a damp terry cloth. Not too wet to avoid borders and do not rub too hard. Dry the darkened, wet area with a hair dryer with cold air to avoid water marks. Then polish remaining darkened areas with the Polishing Pad. This method is also used when greasy areas because of skin or hair contact are darkened. Always practice a cleaning test in a hidden area!

For difficult stains, it is always better to contact a specialist first. Damage can easily occur due to improper cleaning attempts.

For maintenance, we recommend **Aniline Protector**. The Aniline Protector provides the necessary moisturizing to keep the leather soft and prevents fading.

In case of risk of stains caused by liquids, **Water Repellent Spray** is recommended.

Depending on the strain, heat, and light intensity, the leather should be sparingly maintained every three to twelve months.
